EFLAPS FIRST

What did Beadle know & when did he know it?

Dear David -

I was most pleased to hear from you
pers. and for your blotting information.
I never doubted that Beadle had read
Haldane in "Perspectives", if nothing
else - he does cite that too in 1939.

Jan Sapp has a chapter on this for
in his recent book on Mucous. He
also comments on the term "hormone"
which unduly complicated the
pathway analysis.

I am having great fun back in the
lab. But when separate covers will
send you some other recent writings
no experimental papers as yet.

With all best wishes,

I shall share that i. Rich Beams who is
writing a book on Parrot.

P.S. I found no citations to Beadle 1939 (Int'l Rev.)
mid 1945-1954!
